

Universal Comparative Intelligence & Executive Dossier Engine

The 3Sci Competitor Shift Radar is a zero-telemetry, client-side intelligence suite built for corporate strategists, M&A partners, procurement leads, and analysts. It transforms raw entity rosters into authentic, AI-differentiated comparative matrices and formatted executive dossiers covering 18 domain-specific analytical frameworks.

1. The 3-Step Rapid Intelligence Workflow

Step 1: Set Up Roster & API Key

Enter your free Google Gemini API Key in the top header bar (stored locally in browser storage). Add up to 10 entities (enterprises, startups, political figures, sports icons, or authors). Mark one as the ★ **Primary / Benchmark Baseline**.

Step 2: Generate Differentiated Matrix

Toggle your active comparison parameters (e.g., *General Landscape Overview*, *Core Product*, *Pricing Tiers*). Click ⚡ **Populate Matrix with AI** for authentic intelligence, or click into any table cell to edit directly.

Step 3: Executive Report Generation & Dissemination

Select from 18 analytical angles (e.g., *Product & Price Comparisons*, *SWOT*, *Political Stance*, *Personalities & Achievements*). Click ⚡ **Generate Report using AI** to run Gemini 3.8 Flash, or 📄 **Generate Prompt** to copy formatted prompts for ChatGPT or Claude. Export instantly to **.DOC** or print-ready **PDF**.

2. Configurable Matrix Comparison Dimensions

Parameter Dimension	Analytical Focus	Strategic Utility
★ General Landscape Overview	High-level categorization & strategic posture	Executive overview without granular detail; ideal for board briefings.
Core Product / Value Prop	Flagship offering, platform capabilities, or signature works	Evaluates functional overlap, flagship differentiators, and commoditization risks.
Target Customer & Positioning	Buyer personas, addressable market, constituent base	Pinpoints customer segments or voter demographics neglected by contenders.
Observed Moat / Vulnerability	Structural defensibility, lock-in, churn liabilities	Exposes fragility where the benchmark entity can exploit rivals.
Pricing Strategy & Tiers	Monetization models, subscription tiers, TCO friction	Compares pricing power elasticity, packaging traps, and discounting opacity.
Tech Stack / Velocity	Infrastructure modernity, engineering velocity	Evaluates technology debt vs. rapid AI-driven platform delivery.

Data Privacy Guarantee: 100% Client-Side Architecture. API keys and target data remain inside your browser sandbox. No server-side tracking.

3. The 18 Domain-Specific Reporting Frameworks

The workspace dynamically adjusts its analysis, scoring rubrics, and diagnostic questions based on your chosen angle:

Report Angle	Core Investigative Focus & Output Architecture
Product & Price Comparisons	Side-by-side feature packaging, licensing tiers, total cost of ownership (TCO), and price-to-value elasticity scorecards.
Competitor Profile & Market Share	Origins, leadership ethos, operational footprint, addressable segment dominance, and customer acquisition momentum.
SWOT & Defensibility	Forensic Strengths, Weaknesses, Opportunities, and Threats contrasting contenders against the designated benchmark.
Feature Comparison & Win/Loss	Direct capability parity, evaluation criteria, primary sales objections, buyer deal-breakers, and churn drivers.
Customer Sentiment & Reviews	Public perception, NPS signals, brand loyalty, recurring customer complaints, and advocacy metrics.
Sales & Strategy Positioning	Go-to-market execution, revenue stability, category wedges, brand narratives, and counter-positioning levers.
Technology & Ecosystems	Engineering velocity, IP moats, developer integrations, channel resellers, and disruption vulnerability.
Digital Marketing & Social Media	SEO authority, paid acquisition reach, share of voice, audience engagement depth, and executive personal branding.
Emerging Threats & Disruptors	Unobserved edge players, cross-industry invaders, open-source alternatives, and macro structural headwinds.
Political Stance & Main Policies	Ideological alignment, legislative voting records, platform planks, voter coalition loyalty, and rhetorical liabilities.
Personalities & Achievements	Comparative dossier for athletes, authors, scientists, and creators covering career milestones, titles, and historical legacy.

4. Structured Executive Dossier Exports

Clicking  **Download Report (.DOC)** or  **Download Report (PDF)** generates a structured executive briefing packet that includes:

- **Executive Overview Table:** Formal header displaying framework, benchmark subject, cohort list, active dimensions, and evaluation date.
- **Embedded Landscape Matrix:** The complete multi-parameter comparison table rendered prior to the detailed narrative.
- **Parsed Executive Narrative:** Formatted headings, subheadings, bullet lists, scorecards, and sharp diagnostic inquiries.

5. Executive Use Cases by Role

For Enterprise Procurement & Commercial Officers: Vendor Negotiation

Select the **Product Comparison and Price Comparisons** angle. Use the generated Feature-by-Feature Value Ledger and Diagnostic Buyer Questions to expose hidden renewals, tier lock-ins, and licensing traps before signing enterprise contracts.

For Corporate Strategists & Founders: Asymmetric Counter-Positioning

Benchmark your firm against 4–6 market incumbents. Use the *Observed Moat* and *Target Customer* parameters to uncover underserved segments and craft positioning campaigns that exploit incumbents' pricing rigidity.

For Campaign Strategists & Political Analysts: Policy Contrast Memos

Select the **Political Stance and Main Policies** angle. Contrast political figures or parties across key legislative planks, voter coalition loyalty, and policy contradictions to prepare for debates or legislative analysis.

For Cultural Critics & Researchers: Comparative Biographies

Select the **Personalities and Achievements** angle. Compare authors, historical figures, or elite sports icons (e.g., Federer vs. Nadal vs. Djokovic) across career milestones, technical mastery, and long-term historical impact.

6. Operational FAQ & Diagnostic Tips

Scenario	Recommended Solution
Gemini API Error	Confirm that your Google Gemini API key is pasted into the top header bar and that your browser allows outbound HTTPS calls to Google Generative Language endpoints.
Customizing Matrix Notes	Click directly into any cell in the Competitive Summary Matrix. Cells are fully editable (contenteditable) and synchronize into your downloaded Word/PDF dossier.
External AI Workflows	Click  Generate Prompt and then Copy Prompt to paste the synthesized intelligence prompt directly into ChatGPT Plus, Claude Team, or Perplexity Pro.
