

Universal Comparative Intelligence & Executive Dossier Engine

The 3Sci **Competitor Shift Radar** is a zero-telemetry, client-side intelligence platform designed for founders, corporate strategists, procurement leads, and M&A analysts. It converts raw target rosters into structured comparative matrices and ready-to-share executive briefings across 18 specialized analytical angles.

1. The 3-Step Rapid Intelligence Workflow

Step 1: Roster & Global API Key

Enter your Google Gemini API Key into the top header bar (stored locally in browser storage). Enter company/subject names in the left-hand roster (up to 10 entities). Mark one as the ★ **Benchmark Baseline**. Use 🗑️ **Clear Roster** whenever starting a fresh evaluation.

Step 2: Dynamic Matrix Differentiation

Toggle your active comparison parameters (e.g. *General Landscape Overview*, *Core Product*, *Pricing Strategy*). Click ⚡ **Populate Matrix with AI** for authentic company-specific intelligence, or click into any cell to edit notes directly.

Step 3: Dual Intelligence Execution & Dossier Export

Select from 18 analytical frameworks (e.g., *Product Comparison and Price Comparisons*, *SWOT*, *Political Stance*, *Personalities & Achievements*). Click ⚡ **Generate Report using AI** to run Gemini 3.8 Flash, or 📄 **Generate Prompt** to export formatted prompts for ChatGPT or Claude. Export instantly to formatted **.DOC** or print-ready **PDF**.

2. Configurable Comparison Dimensions

Parameter Dimension	Analytical Focus	Primary Strategic Value
★ General Landscape Overview	High-level categorization & strategic posture	Delivers clean synthesis without granular clutter; ideal for fast executive reviews.
Core Product / Value Prop	Flagship offering, core portfolio, platform moats	Exposes functional overlap, capability gaps, and commoditization liabilities.
Target Customer & Positioning	Buyer personas, addressable market, constituent base	Identifies underserved demographics or procurement accounts neglected by rivals.
Observed Moat / Vulnerability	Structural defensibility, lock-in, churn risk	Reveals critical vulnerabilities where the benchmark firm can counter-position.
Pricing Strategy & Tiers	Monetization models, subscription tiers, TCO friction	Exposes pricing power elasticity, discounting opacity, and packaging traps.
Tech Stack / Velocity	Infrastructure modernity, engineering velocity	Measures software delivery speed and vulnerability to AI-driven paradigm shifts.

Data Privacy Guarantee: 100% Client-Side Architecture. API keys and target data remain entirely inside your browser sandbox. Zero telemetry or server tracking.

3. The 18 Domain-Specific Reporting Frameworks

Selecting any reporting angle recalibrates the underlying intelligence directives, scoring scorecards, and diagnostic inquiries:

Report Angle	Analytical Focus & Output Deliverables
Product & Price Comparisons	Side-by-side feature packaging, licensing tiers, total cost of ownership (TCO), and price-to-value elasticity scorecards.
Competitor Profile & Market Share	Organizational origins, leadership ethos, operational footprint, addressable segment dominance, and expansion velocity.
SWOT & Commercial Defensibility	Forensic Strengths, Weaknesses, Opportunities, and Threats contrasting contenders against the benchmark.
Feature Comparison & Win/Loss	Capability parity ledger, primary sales objections, evaluation deal-breakers, and customer churn drivers.
Customer Sentiment & Reviews	Public perception, NPS signals, brand loyalty, recurring complaints, and customer advocacy metrics.
Sales & Strategy Positioning	Go-to-market execution, revenue defensibility, category wedges, brand narratives, and counter-positioning vectors.
Technology & Ecosystems	Engineering velocity, IP defensibility, developer integrations, channel resellers, and disruption risks.
Digital Marketing & Social Media	SEO authority, paid acquisition reach, share of voice, engagement depth, and executive personal branding.
Emerging Threats & Disruptors	Unobserved edge contenders, cross-industry invaders, open-source alternatives, and structural headwinds.
Political Stance & Main Policies	Ideological alignment, legislative voting records, platform planks, voter coalition loyalty, and rhetorical contradictions.
Personalities & Achievements	Comparative dossiers for sports icons, authors, artists, and leaders covering career peaks, titles, and historical legacy.

4. Structured Executive Dossier Export Engine

Clicking  **Download Report (.DOC)** or  **Download Report (PDF)** generates a publication-grade briefing containing:

- **Executive Overview Table:** Header table detailing framework, benchmark baseline, cohort list, active dimensions, and evaluation date.
- **Embedded Landscape Matrix:** The complete multi-parameter comparison table rendered prior to the detailed narrative.
- **Parsed Intelligence Briefing:** Clean styling, highlighted metrics, structured scorecards, and sharp diagnostic inquiries.

5. Executive Use Cases by Role

For Enterprise Procurement & Pricing Strategists: Contract Negotiation

Select the **Product Comparison and Price Comparisons** angle. Use the *Feature-by-Feature Value Ledger* and *Diagnostic Buyer Inquiries* to uncover hidden fees, renewal escalators, and packaging traps before executing enterprise vendor agreements.

For Corporate Founders & Strategists: Asymmetric Counter-Positioning

Benchmark your offering against market incumbents. Use the *Observed Moat* and *Target Customer* parameters to uncover underserved buyer cohorts and build messaging campaigns that exploit incumbents' pricing rigidity.

For Campaign Strategists & Political Analysts: Policy Contrast Briefs

Select the **Political Stance and Main Policies** angle. Contrast political candidates or parties across key legislative planks, voter coalition loyalty, and policy contradictions to prepare for debates or legislative analysis.

For Cultural Critics & Researchers: Comparative Biographies

Select the **Personalities and Achievements** angle. Compare authors, historical figures, or elite sports icons (e.g., Federer vs. Nadal vs. Djokovic) across career milestones, technical mastery, and long-term historical impact.

6. Operational FAQ & Diagnostic Tips

Scenario	Recommended Solution
Gemini API Error	Confirm that your Google Gemini API key is entered into the top header bar and that your browser allows outbound HTTPS calls to Google Generative Language endpoints.
Customizing Matrix Cells	Click directly into any cell in the Competitive Summary Matrix. Cells are editable (contenteditable) and synchronize into your downloaded Word/PDF dossier.
Clearing the Cohort	Click  Clear Roster in the left panel to reset all inputs down to a clean slate and clear cached data.
