

The Competitor Shift Radar & Due Diligence Matrix

Multi-target competitive intelligence, side-by-side product benchmarking, and dual-mode AI analysis running entirely on your local machine.

Strategic Value: Why Local Multi-Target Intelligence Matters

Traditional corporate intelligence SaaS charges hundreds of dollars per month to deliver superficial website change alerts. Work Hack #4 provides founders, M&A analysts, and executive candidates with a zero-cost, private command center to benchmark up to 10 organizations side-by-side. All company rosters, proprietary notes, and API keys remain stored strictly inside your local browser.

1. Key Platform Capabilities

ZERO-COST • CLIENT-SIDE

10-Company Comparison Matrix

Track up to 10 entities simultaneously. Assign your own company as the primary benchmark to uncover positioning gaps and pricing leverage.

Products & Services Mapping

Explicitly catalogue core offerings, service delivery models, and features to benchmark high-margin recurring software against bespoke services.

Direct In-Browser Gemini 3.8 Flash

Execute full neural synthesis with zero tab-switching using a free Google AI Studio key stored only in your local browser cache.

Precision Prompt Synthesizer

Translates raw, unstructured user doubts into battle-tested executive briefs formatted for ChatGPT, Claude, and Perplexity.

2. Quick Start: 3-Minute Setup

NO INSTALLATION REQUIRED

STEP 01

Open the Local Workspace

Navigate to `E:\3sci\Work Hacks\The Competitor Shift Radar` and double-click `index.html`. The dashboard launches instantly in your default web browser.

STEP 02

Configure Target Companies & Products

Enter company names, core products, and key destination links (Homepage, Pricing, and Careers). Select one organization as your benchmark firm.

STEP 03

Select Persona & Synthesize Intelligence

Pick an analytical lens (M&A Auditor, Headhunter, or Contrarian Founder), input specific doubts, and execute live analysis or export to Word.

3. Understanding the Dual AI Workflow

FLEXIBILITY & CONTROL

Work Hack #4 is built to eliminate vendor lock-in. You can run automated analysis right within the dashboard or route precision prompts to your preferred frontier model.

Execution Path	How to Use	Best For
OPTION A Live Gemini 3.8 Flash	Paste your free Google AI Studio API key in the green input box. Click ⚡ Run Live AI Analysis . Synthesis streams directly into the dashboard.	Rapid in-workspace diagnosis, immediate side-by-side reading, and automated inclusion into downloaded Word dossiers.
OPTION B Precision Prompt Copy	Select your persona and output structure. Click Copy Formatted Prompt . Paste into ChatGPT-4o, Claude 3.5 Sonnet, or Perplexity.	Deep reasoning sessions, cross-checking with live web search engines, or private enterprise LLM accounts.

4. Step-by-Step UI Guide & Controls

INTERACTIVE DASHBOARD

PANEL 1

The Target Roster (Left Rail)

Add up to 10 companies using the **+ Add Another Company** button. Each card includes dedicated inputs for Company Name, Core Products/Services, Homepage, Pricing URL, and Careers URL. Click the radio button on any card to designate it as the ★ **Benchmark Firm**.

PANEL 2

Side-by-Side Matrix Display (Top Right)

Shows all competitors organized in an executive comparison table. Updates dynamically as you type. Includes instant export triggers: 📄 **Export as .DOC** (Word file), 🖨️ **Export as PDF** (print dialog), and 📋 **Copy Markdown**.

PANEL 3

Prompt Studio & Gemini Console (Bottom Right)

Contains analytical persona selectors, required deliverable dropdowns (e.g. 1-10 Defensibility Scorecard, Unasked Leadership Probes), an open text box for your raw questions, and the secure Gemini execution bar.

5. Export Formats & Sharing Capabilities

EXECUTIVE READY

📄 Microsoft Word (.DOC) Export

Generates a fully formatted Word document containing the complete company matrix, live Gemini briefing (if executed), and the underlying strategic prompt.

🖨️ Print-to-PDF Engine

Uses print-calibrated CSS to automatically strip left-hand editing inputs, navigation buttons, and empty spaces, formatting the matrix for formal A4 sharing.

6. Strategic Playbooks by User Persona

PRACTICAL APPLICATIONS

PLAYBOOK A

Founders & Agency Leaders (Counter-Positioning)

Goal: Identify underserved market niches. Set your company as the Benchmark and select *Contrarian Founder* mode. In the questions box, ask: "Where are competitors overpriced, and what product feature are they all ignoring?" Use the output to craft high-conversion landing page hooks.

PLAYBOOK B

M&A Analysts & Investors (Commercial Due Diligence)

Goal: Validate revenue defensibility. Select *M&A Partner* mode and choose *Risk & Defensibility Scorecard (1-10)*. Query: "Which target has true product pricing power versus commoditized one-off consulting?" Export the resulting matrix into Word for inclusion in investment memos.

PLAYBOOK C

Job Seekers & Executive Candidates (Career Due Diligence)

Goal: Avoid joining struggling firms. Select *Executive Headhunter* mode and choose *Unasked Critical Questions*. Query: "What hidden operational cracks or tech stack obsolescence does their hiring indicate?" Arm yourself with board-level questions for executive interviews.

✨ Always ask your preferred AI platform if you need help customizing code!

This hack is 100% open source and designed for direct modification. If you wish to add auto-saving to local spreadsheets, custom PDF styles, or employee review scraping, paste `index.html` into ChatGPT, Claude, or Gemini with this prompt:

"Here is my `index.html` file for Work Hack #4. Please maintain all existing Gemini API and export functions, but add an extra column to track estimated annual revenue for each company."
